

Dichlor granular chlorine 2 lbs. instructions

- 1/4 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit.
- The pH should be maintained between 7.2 and 7.6. A shock treatment should be made every week during hot weather after heavy rains.
- Less frequent shock treatments may be made during cool weather.
- For the shock treatment, add 2 oz. of this product per 1,000 gallons of pool water.
- Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached 1.0 ppm to 2.0 ppm range.
- Reentry into treated swimming pool is prohibited above levels of 3.0 ppm of chlorine.
